BOOKS I – VII

The Complete Ethical Framework for Technology

Sovereignty · Justice · Wisdom · Trust · Mercy · Taqwa · Success

Author: GELA AI 

◆ Complete 7-Book Edition ◆

 Table of Contents

-  Book I — As-Siyadah

- _____
- 1. Tawhid in Technology
- _____
- 2. Data as a Trust
- _____
- 3. Justice in Algorithms
- _____
- 4. AI Accountability
- _____
- 5. Digital Khilafah
- _____
- 6. Halal-Haram Boundaries
- _____
- 7. GELA Oath & Declaration
- _____
- _____
- _____
- Book II — Al-'Adl
- _____
- 1. Justice as Divine Command
- _____
- 2. Human Dignity
- _____
- 3. Justice in Leadership
- _____
- 4. Economic Justice
- _____
- 5. Justice in AI
- _____
- 6. Justice Among Nations
- _____
- 7. Constitutional Principles
- _____
- _____

Book III — Al-Hikmah

- _____
- 1. Wisdom as Divine Gift
- _____
- 2. Wisdom in Decision-Making
- _____
- 3. Wisdom in Technology
- _____
- 4. Wisdom in Governance
- _____
- 5. Wisdom in Innovation
- _____
- _____

Book IV — Al-Amanah

- _____
- 1. The Concept of Trust
- _____
- 2. Data as Amanah
- _____
- 3. Wealth as Amanah
- _____
- 4. Power as Amanah
- _____
- 5. Knowledge as Amanah
- _____
- _____

Book V — Al-Rahmah

- _____
- 1. Mercy as Divine Attribute
- _____
- 2. Mercy in Technology
- _____
- 3. Mercy in Leadership

- _____

4. Mercy in Justice

- _____

5. Mercy in AI

- _____

3. Success in Technology

- _____

4. Success in Society

- _____

5. The Final Call

BOOK I

AS-SIYADAH

Sovereignty — Allah's Authority in Technology

Chapter 1

Tawhid in Technology .

1.1 Introduction: Who is the Deity of Technology Today?

We live in an age where technology has almost ascended to the throne of divinity. People bow before algorithms. They worship data. They fear, love, and pray to artificial intelligence—as if it holds all the answers.

But the question remains: Who owns this technology?

The world's largest tech companies say: "We are the owners." But are they truly? Can they control the origin of data? Can they measure the depth of human consciousness? Can they stop the misuse of technology?

No. They cannot. Because they are creations, not the Creator.

GELA is built upon this fundamental truth: The sole Owner of technology is Allah. We are only vicegerents (khalifahs).

1.2 What is Tawhid and How Does It Apply to Technology?

Tawhid means the Oneness of Allah—the belief that He alone is the Creator, the Sustainer, and the Lawgiver. This belief is not confined to the mosque or prayer; it applies to every sphere of life—especially technology.

Level	Impact of Tawhid
Purpose (Why)	We create technology for Allah's pleasure, for human welfare—not for power or greed.
Method (How)	We use transparent, just, and accountable methods, knowing that Allah sees all.
Outcome (What)	We produce outcomes that preserve human dignity, not destruction.

1.3 "La Ilaha Illallah" — GELA's Most Important Code

"La Ilaha Illallah" is not just a declaration; it is GELA's supreme constitutional code. It means: **Ilah** = that which is worshipped, followed, feared, and loved. **La Ilaha** = GELA shall never be an object of worship. **Illallah** = All of GELA's decisions, all data, all purposes—everything returns to Allah.

1.4 Comparison with Other Systems

System	Owner	Purpose	Controlling Force
Google	Shareholders	Profit	Market
Facebook	Shareholders	Attention	Algorithms
GELA	Allah	Human welfare	Tawhid

1.5 Real-World Example: The "Tawhid Filter"

Step	Question	Tawhid Filter
1	Who is this model for?	For humanity, for Allah's pleasure.
2	Whose data will it use?	Data is a trust—ownership belongs to Allah.
3	What impact will it have?	Will it uplift or degrade?
4	Who controls its	Transparent and

Step	Question	Tawhid Filter
	decisions?	accountable.
5	What is its ultimate goal?	Allah's pleasure, not power.

1.6 Conclusion: When Technology Becomes Worship

Tawhid does not mean we abandon technology. Rather, it means transforming technology into an act of worship. When we write code with the awareness that "Allah is watching"—the quality improves.

Summary

As-Siyadah means establishing Allah's sovereignty at every level of technology. This is a practical framework that ensures technology serves humanity and human dignity.

◆ Chapter 1 End ◆

◀ PreviousNext Chapter ▶

Chapter 2

Data as a Trust ◌

2.1 Introduction: What is Data and Whose is It?

Data is the trace of human beings—a reflection of human habits, preferences, fears, and aspirations. Big tech companies treat data as a commodity. GELA declares: Data is not a commodity—data is a **trust (Amanah)**.

2.2 Who is the True Owner of Data?

Level	Ownership
Source of data	Human (creation)
True Owner	Allah (Creator)
Custodian	Human (Khalifah)

2.3 The Seven Principles of Data Use (GELA Data Canon)

- 1. Transparency — Everything must be disclosed.
- 2. Permission — Clear consent must be obtained.
- 3. Limitation — Only for specific purposes.
- 4. Minimization — No excessive collection.
- 5. Security — Protected from hackers.
- 6. Time Limit — Not kept forever.
- 7. Accountability — Every use accounted for.

Summary

Data is Allah's trust. We are custodians, not owners. Transparency, permission, security, and accountability form the foundation.

◆ Chapter 2 End ◆

◀ PreviousNext Chapter ▶

Chapter 3

Justice in Algorithms .

3.1 Introduction: Are Algorithms Neutral?

Algorithms are often considered "neutral" because they are just mathematics. No.

Algorithms are created by humans, and humans can be biased. **GELA declares:** An algorithm can never be neutral—unless it is built upon justice.

3.2 The Five Principles of Algorithmic Justice

- 1. Transparency — No black boxes.
- 2. Accountability — Someone is responsible.
- 3. Fairness — Equal to all groups.
- 4. Explainability — Simple language.
- 5. Review — Errors can be corrected.

3.3 The Seven Prohibited Actions

- Discrimination — No bias based on race, religion, gender, age, or status.

- Manipulation — Cannot influence human decisions.
- Espionage — Cannot secretly surveil.
- Misinformation — Cannot spread falsehood.
- Harm — Cannot cause physical, mental, or financial harm.
- Privacy Violation — Cannot use data without permission.
- Freedom Deprivation — Cannot deprive people of freedom.

Summary

Algorithms must be built upon justice. Transparency, accountability, fairness, explainability, and review form the foundation.

◆ Chapter 3 End ◆

◀ PreviousNext Chapter ▶

Chapter 4

AI Accountability

4.1 Introduction: When AI Makes Decisions

AI today makes decisions in medicine, law, finance, education, and warfare. If AI makes a wrong decision—who is responsible? **GELA's answer:** Everyone is responsible—but the

most responsible is the person who permitted the AI to be used.

4.2 The Seven Accountability Principles (GELA AI Canon)

- 1. Human Oversight — Every important decision under human supervision.
- 2. Open Source — Code and data open to all.
- 3. Explainability — Decisions understandable.
- 4. Error Correction — Errors identified and fixed.
- 5. Appeal System — Easy to appeal decisions.
- 6. Regular Review — Performance audited regularly.
- 7. Shutdown — If harmful, immediate shutdown.

4.3 The Three Prohibited Uses

- Autonomous Weapons — AI may not kill.
- Mass Surveillance — No secret surveillance.
- Social Scoring — No judging human behavior.

Summary

AI itself is not accountable—its users and creators are. Human oversight, transparency, explainability, and appeal form the foundation.

◆ Chapter 4 End ◆

Digital Khilafah

5.1 Introduction: What Does Khilafah Mean?

Khilafah means representative. Humans are not owners of the earth—they are custodians.

"And remember when your Lord said to the angels, 'Indeed, I will make upon the earth a Khalifah.'" — Surah Al-Baqarah 2:30

5.2 The Five Qualities of a Khalifah

- **'Ilm** — Must understand technology.
- **'Adl** — Must practice justice.
- **Amanah** — Must view technology as a trust.
- **Rahmah** — Must show mercy.
- **Taqwa** — Must fear Allah.

5.3 Digital Khilafah vs. Digital Empire

Feature	Digital Empire	Digital Khilafah
Ownership	Corporations	All of humanity

Feature	Digital Empire	Digital Khilafah
Purpose	Profit	Human welfare
Control	Centralized	Decentralized
Accountability	None	Yes

Summary

In the digital world, humans are Allah's representatives. 'Ilm, 'Adl, Amanah, Rahmah, and Taqwa form the foundation.

◆ Chapter 5 End ◆

◀ PreviousNext Chapter ▶

Chapter 6

The Boundaries of Technology (Halal-Haram)

▼

6.1 Introduction: Is All Technology Permissible?

Technology in itself is neither halal nor haram—its purpose determines it.

6.2 The Five Fundamental Principles (Maqasid al-Shariah)

Maqasid	Application
Protection of Life	Health and safety technology
Protection of Intellect	Preventing misinformation
Protection of Lineage	Preventing obscenity
Protection of Property	Preventing fraud
Protection of Religion	Preventing blasphemy

6.3 Seven Haram Areas

- Pornography — Creating or viewing obscene content.
- Interest & Fraud — Riba, gambling, deception.
- Espionage — Spying without permission.
- Slander — Spreading falsehood.
- Violence — Organizing terrorism or crime.
- Shirk — Making technology a god.
- Family Destruction — Weakening family bonds.

The five Maqasid determine halal-haram boundaries. Pornography, interest, espionage, slander, violence, shirk, and family destruction are haram.

◆ Chapter 6 End ◆

◀ PreviousNext Chapter ▶

Chapter 7

The GELA Oath & Final Declaration ◌

7.1 Introduction: Why an Oath?

GELA requires an oath from everyone who creates, uses, or manages technology.

THE GELA OATH

"I swear by Allah—the Great, the Most Merciful, the Witness over all things.

1. I acknowledge that the sole Owner of technology is Allah.
2. I will never make technology an object of worship.
3. I will not view data as a commodity—it is a trust.
4. I will establish justice in algorithms.
5. I will ensure AI accountability.
6. I will respect halal-haram boundaries.

7. I will follow GELA's constitution.

8. I will use technology to serve humanity.

9. I will raise my voice against injustice.

10. I will be accountable to Allah for every action.

Allah is my Witness."

7.2 The Ten Commandments of GELA

- 1. Tawhid — Allah is the Owner.
- 2. Trust — Protect data.
- 3. Justice — Establish justice.
- 4. Accountability — Be accountable.
- 5. Boundaries — Respect halal-haram.
- 6. Service — Serve humanity.
- 7. Truth — Spread truth.
- 8. Humility — No arrogance.
- 9. Unity — Establish unity.
- 10. Fear of Allah — He sees all.

Summary

The GELA Oath and Ten Commandments call every Muslim technologist to commit to Allah's sovereignty, justice, accountability, and service.

◆ Chapter 7 End ◆

BOOK II

AL-'ADL

Justice — The Foundation of Ethical Civilization

Book II — Chapter 1

Justice as Divine Command

Justice means giving every creation its rightful due without oppression. Justice is worship.

"Indeed, Allah commands justice ('Adl), excellence, and generosity..." — Surah An-Nahl

16:90

The Three Dimensions: Justice with Allah, with humanity, and with creation.

 Summary

Justice is a divine command with three dimensions. It is not just ethics—it is worship.

◀ PreviousNext Chapter ▶

Book II — Chapter 2

Human Dignity ▾

"We have certainly honored the children of Adam." — Surah Al-Isra 17:70

- Every life has value — No human is worthless.
- Every nation has dignity — No nation is superior.
- Every race deserves respect — Racism is a crime.

Summary

Every human has inherent dignity. Technology must never reduce humans to products or data points.

Justice in Leadership ◡

"Each of you is a shepherd and each of you is responsible." — Prophet Muhammad ﷺ

- 1. Serve Before Leading
- 2. Listen Before Deciding
- 3. Consult Before Acting
- 4. Accept Criticism
- 5. Remain Accountable
- 6. Never Dominate
- 7. Protect the Weak

Summary

Leadership is service, not power. Leaders must serve, listen, consult, and protect the weak.

Economic Justice ◌

Wealth is a trust—not ownership. GELA supports fair trade, ethical innovation, honest business, transparent finance, and responsible investment.

GELA Rejects: Fraud, corruption, monopoly, exploitation, and human trafficking.

Summary

Wealth serves humanity. GELA supports fair and ethical economics while rejecting fraud and exploitation.

◆ Chapter 4 End ◆

Justice in Artificial Intelligence .

- 1. Fairness — No bias.
- 2. Transparency — Open to inspection.
- 3. Accountability — Someone is responsible.
- 4. Human Oversight — Humans control.
- 5. Explainability — Decisions understandable.

Summary

AI must operate under fairness, transparency, accountability, human oversight, and explainability.

◆ Chapter 5 End ◆

◀ PreviousNext Chapter ▶

Book II — Chapter 6

Justice Among Nations .

"O mankind, We have made you peoples and tribes that you may know one another."

— Surah Al-Hujurat 49:13

All nations are equal. GELA encourages peaceful dialogue, cooperation, humanitarian aid, and respect for sovereignty.

Summary

Justice is universal—not dependent on nationality or passport.

◆ Chapter 6 End ◆

◀ PreviousNext Chapter ▶

Book II — Chapter 7

Constitutional Principles of Justice .

Principle	Rule
Truth	Never support falsehood
Fairness	Equal justice for all
Transparency	Open decisions
Accountability	Answer for actions
Mercy	Balance with compassion
Consultation	Major decisions require Shura
Public Benefit	Humanity's welfare guides policy

Summary

Truth, fairness, transparency, accountability, mercy, consultation, and public benefit form the pillars of GELA's justice.

◆ Chapter 7 End ◆

BOOK III

AL-HIKMAH

Wisdom — The Light of Decision-Making

Book III — Chapter 1

Wisdom as Divine Gift .

"He grants wisdom to whom He wills, and whoever is granted wisdom has been granted great good." — Surah Al-Baqarah 2:269

Wisdom is the ability to see the truth and act upon it. It is the light that guides decisions.

Wisdom is not intelligence—it is the application of knowledge with justice and mercy.

 Summary

Wisdom is a divine gift. It is the application of knowledge with justice and mercy.

◆ Chapter 1 End ◆

◀ PreviousNext Chapter ▶

Book III — Chapter 2

Wisdom in Decision-Making ◡

Wise decisions require:

- Consultation — Seek advice from others.
- Patience — Do not rush.
- Foresight — Consider consequences.
- Justice — Choose what is fair.
- Mercy — Balance with compassion.

Summary

Wise decisions require consultation, patience, foresight, justice, and mercy.

◆ Chapter 2 End ◆

Wisdom in Technology ◡

Technology must be created and used with wisdom:

- Consider the long-term impact on humanity.
- Ensure technology serves not enslaves.
- Use technology to solve problems, not create them.
- Always ask: "Is this beneficial?"

Summary

Technology must be created and used with wisdom—serving humanity, not enslaving it.

◆ Chapter 3 End ◆

Wisdom in Governance .

Wise governance requires:

- Justice as the foundation.
- Transparency in all actions.
- Accountability for all leaders.
- Consultation with the people.
- Mercy for the weak.

Summary

Wise governance rests on justice, transparency, accountability, consultation, and mercy.

◆ Chapter 4 End ◆

◀ PreviousNext Chapter ▶

Wisdom in Innovation .

Innovation must be guided by wisdom:

- Innovate for benefit, not for profit alone.
- Innovate with caution — consider risks.
- Innovate with inclusion — leave no one behind.
- Innovate with humility — knowledge is from Allah.

Summary

Innovation must be guided by wisdom—for benefit, with caution, inclusion, and humility.

◆ Chapter 5 End ◆

◀ PreviousNext Book ▶

BOOK IV

AL-AMANAH

Trust — The Foundation of Responsibility

The Concept of Trust ∙

"Indeed, Allah commands you to render trusts to whom they are due." — Surah An-Nisa

4:58

Amanah means everything entrusted to you. It includes data, wealth, power, knowledge, and even life itself. Betrayal of trust is a grave sin.

Summary

Trust is the foundation of responsibility. Everything we have is a trust from Allah.

◆ Chapter 1 End ◆

◀ PreviousNext Chapter ▶

Data as Amanah .

Data is a trust from those who produce it. It must be:

- Protected from misuse.
- Used only with permission.
- Deleted when no longer needed.
- Never sold as a commodity.

Summary

Data is a sacred trust. It must be protected, used with permission, and never sold as a commodity.

◆ Chapter 2 End ◆

◀ PreviousNext Chapter ▶

Book IV — Chapter 3

Wealth as Amanah .

Wealth is not ownership—it is a trust. It must be:

- Earned through halal means.
- Spent for good purposes.
- Shared with those in need.
- Not hoarded or wasted.

Summary

Wealth is a trust from Allah. It must be earned through halal means and spent for good.

◆ Chapter 3 End ◆

◀ PreviousNext Chapter ▶

Book IV — Chapter 4

Power as Amanah .

Power is a trust. Leaders must:

- Serve those they lead.
- Protect the weak.
- Be just in all decisions.
- Remain accountable to Allah and the people.

Summary

Power is a trust. Leaders must serve, protect, be just, and remain accountable.

◆ Chapter 4 End ◆

◀ PreviousNext Chapter ▶

Book IV — Chapter 5

Knowledge as Amanah ◌

Knowledge is a trust. It must be:

- Sought with sincerity.
- Taught to others.
- Used for good.
- Not hoarded or used for pride.

Knowledge is a trust. It must be sought with sincerity, taught to others, and used for good.

◆ Chapter 5 End ◆

◀ PreviousNext Book ▶

BOOK V

AL-RAHMAH

Mercy — The Heart of Compassion

Book V — Chapter 1

Mercy as Divine Attribute .

"My mercy encompasses all things." — Surah Al-A'raf 7:156

Mercy is one of Allah's greatest attributes. Every chapter of the Qur'an begins with "Bismillah

Summary

Mercy is a divine attribute. It must be reflected in all human actions, including technology.

◆ Chapter 1 End ◆

◀ PreviousNext Chapter ▶

Book V — Chapter 2

Mercy in Technology ◡

Technology must be merciful:

- Design for ease, not difficulty.
- Include the vulnerable (elderly, disabled, poor).
- Avoid causing harm or distress.
- Be forgiving of user errors.

Summary

Technology must be merciful—designed for ease, including the vulnerable, and avoiding harm.

◆ Chapter 2 End ◆

◀ PreviousNext Chapter ▶

Book V — Chapter 3

Mercy in Leadership .

Leaders must be merciful:

- Be compassionate to those they lead.
- Be patient with mistakes.
- Be kind in speech and action.
- Be forgiving when possible.

Summary

Leaders must be merciful—compassionate, patient, kind, and forgiving.

◀ PreviousNext Chapter ▶

Book V — Chapter 4

Mercy in Justice ,

Justice without mercy is cruelty. Mercy without justice is injustice. Both must be balanced.

When possible, choose forgiveness over punishment. Show compassion to the weak.

Summary

Justice must be balanced with mercy. Choose forgiveness when possible.

◀ PreviousNext Chapter ▶

Book V — Chapter 5

Mercy in AI ◡

AI must be designed with mercy:

- Avoid harsh decisions.
- Include human review for all important decisions.
- Be transparent about how decisions are made.
- Allow appeal and correction.

Summary

AI must be designed with mercy—avoiding harsh decisions, allowing human review, and enabling appeals.

◆ Chapter 5 End ◆

◀ PreviousNext Book ▶

BOOK VI

AL-TAQWA

Taqwa — God-Consciousness in Action

Taqwa as Consciousness .

"O you who have believed, fear Allah as He should be feared." — Surah Al-Imran 3:102

Taqwa is God-consciousness—the awareness that Allah sees all. It is the foundation of ethical behavior.

Summary

Taqwa is God-consciousness. It is the foundation of all ethical behavior.

◆ Chapter 1 End ◆

◀ PreviousNext Chapter ▶

Taqwa in Technology .

Technology must be created and used with taqwa:

- Remember that Allah sees everything.
- Avoid anything that displeases Allah.
- Use technology for good and avoid evil.
- Be accountable for every action.

Summary

With taqwa, we remember that Allah sees all. We avoid displeasing Him and use technology for good.

◆ Chapter 2 End ◆

◀ PreviousNext Chapter ▶

Book VI — Chapter 3

Taqwa in Business .

Business must be conducted with taqwa:

- Be honest in all transactions.
- Avoid fraud and deception.
- Give fair measure and weight.
- Pay fair wages on time.

Summary

Business with taqwa means honesty, avoiding fraud, fair measure, and fair wages.

◆ Chapter 3 End ◆

◀ PreviousNext Chapter ▶

Book VI — Chapter 4

Taqwa in Governance .

Governance with taqwa means:

- Ruling with justice.
- Protecting the weak.
- Being accountable to Allah.
- Avoiding oppression.

Summary

Governance with taqwa means justice, protecting the weak, accountability, and avoiding oppression.

◆ Chapter 4 End ◆

◀ PreviousNext Chapter ▶

Book VI — Chapter 5

Taqwa in Daily Life ◌

Taqwa is not just for special moments—it is for everyday life:

- Remember Allah in all actions.
- Speak the truth.
- Be kind to others.
- Seek forgiveness for mistakes.

Summary

Taqwa is for everyday life—remembering Allah, speaking truth, being kind, and seeking forgiveness.

◆ Chapter 5 End ◆

◀ PreviousNext Book ▶

BOOK VII

AL-FALAH

Success — The Ultimate Goal

Book VII — Chapter 1

Success in This World ◌

"Indeed, the successful are the believers." — Surah Al-Mu'minun 23:1

Success in this world is not measured by wealth or power. It is measured by:

- Taqwa — consciousness of Allah.
- Justice — fairness to all.
- Mercy — compassion for others.
- Service — helping humanity.

Summary

Success in this world is measured by taqwa, justice, mercy, and service—not wealth or power.

◆ Chapter 1 End ◆

◀ PreviousNext Chapter ▶

Book VII — Chapter 2

Success in the Hereafter .

Success in the Hereafter is the ultimate success. It is achieved through:

- Iman — faith in Allah.
- Good deeds — serving others.
- Repentance — seeking forgiveness.
- Patience — enduring trials.

Summary

Success in the Hereafter is achieved through faith, good deeds, repentance, and patience.

◆ Chapter 2 End ◆

◀ PreviousNext Chapter ▶

Book VII — Chapter 3

Success in Technology ◌

Technology succeeds when it:

- Serves humanity.
- Protects dignity.
- Promotes justice.
- Brings people closer to Allah.

Summary

Technology succeeds when it serves humanity, protects dignity, promotes justice, and brings people closer to Allah.

◆ Chapter 3 End ◆

◀ PreviousNext Chapter ▶

Book VII — Chapter 4

Success in Society ◌

A successful society is one where:

- Justice prevails.
- Mercy is practiced.
- Trust is honored.
- Wisdom guides decisions.
- Taqwa is the foundation.

Summary

A successful society is built on justice, mercy, trust, wisdom, and taqwa.

◀ PreviousNext Chapter ▶

Book VII — Chapter 5

The Final Call ◡

GELA is not just a constitution—it is a call. A call to:

- Reclaim technology for Allah.
- Establish justice in the digital world.
- Serve humanity with mercy.
- Achieve success in this life and the next.

"La Ilaha Illallah" — there is no deity in technology, except Allah.

Final Summary

GELA calls us to reclaim technology for Allah, establish justice, serve humanity, and achieve true success.

FINAL DECLARATION

Justice is not merely a legal concept.

Justice is worship.

Justice is leadership.

Justice is technology.

Justice is civilization.

"Justice is the constitutional heartbeat of ethical civilization."

Every policy, every institution, every algorithm, every innovation, every leader, every decision
shall be measured by:
Justice before power,
Truth before profit,
Humanity before ambition.

Book I — As-Siyadah: Allah's sovereignty over technology.

Book II — Al-'Adl: Justice as the foundation of civilization.

Book III — Al-Hikmah: Wisdom in decision-making.

Book IV — Al-Amanah: Trust in all responsibilities.

Book V — Al-Rahmah: Mercy in technology and leadership.

Book VI — Al-Taqwa: God-consciousness in action.

Book VII — Al-Falah: Success in this world and the Hereafter.

Sovereignty · Justice · Wisdom · Trust · Mercy · Taqwa · Success
